

AD-Sports Lens

Design Feature

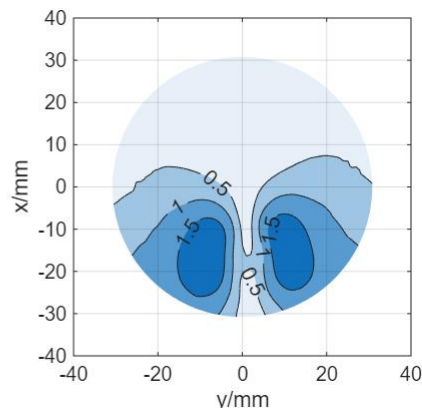

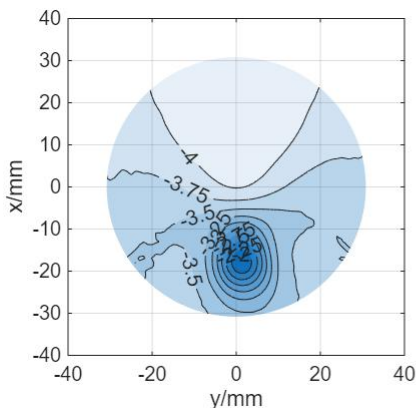

- Guarantees the wearer a good visual experience during sports that often require the formation of a gaze, as with single vision lenses.
- Its unique flexible design and moderately increased lens power ensures that the critical field of vision is clear and stable both above and below the horizontal line.

Most Suitable Wearers

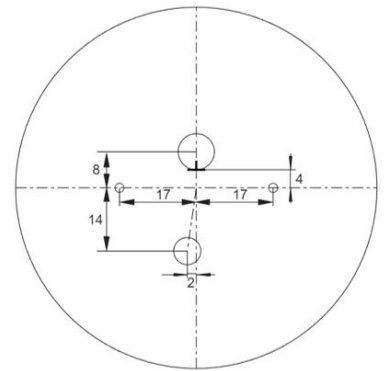

- Maximum distance vision.
- Unmatched dynamic vision with comfortable and precise focus at any distance.
- Optimized fields of view, even with highly wrapped frames and higher prescriptions.
- Near elimination of peripheral blur.

Visual Benefits

- Designed to minimize unwanted visual disturbances, this high-performance lens caters to people with a passion for sports and active lifestyles.
- Keeping the field of vision absolutely clear and stable, regardless of the speed of the sport.
